the recent wave of clinical studies demonstrating long term therapeutic efficacy highlights the enormous potential of gene therapy as an approach to the treatment of inherited disorders and cancer while in recent years lentiviral vectors have dominated the field of ex vivo gene therapy in man adeno associated virus aav vectors have become the platform of choice for the in vivo gene delivery both local and systemic despite the achievements in the clinic however a number of hurdles remain to be overcome in gene therapy these include

availability of scalable vector production systems potential issues associated with insertional mutagenesis and concerns related to immunogenicity of gene therapeutics for aav vectors clinical trials showed that immunity directed against the vector could either prevent transduction of a target tissue or limit the duration of therapeutic efficacy initial observations in the context of a gene therapy trial for hemophilia spurred over a decade efforts by gene therapists and immunologists to understand the mechanism and identify factors that contribute to aav s immunogenicity including the prevalence of b cell and t cell immunity to wild type aav in humans and the interaction of aav vectors with the innate and adaptive immune system despite a number of important contributions in particular in the more recent past our knowledge on the immunology of gene transfer is still rudimentary this is partly due to the fact that the basic understanding of the complex balance between tolerance and immunity to an antigen key aspect of gene transfer with aav keeps evolving rapidly however continuing work towards a better definition of the interaction of viral vectors with the immune system has led to significant advances in the knowledge of the factors influencing the outcome of gene transfer such as the vector dose the immune privilege of certain tissues and the induction of tolerance to an antigen a better understanding of the structure function relationship of the viral capsid has boosted the development of novel immune escape vector variants in addition novel immunomodulatory strategies were established to prevent or reduce anti capsid immunity have been developed and are being tested in preclinical models and in clinical trials together these advances are bringing us closer to the goal of achieving safe and sustained therapeutic gene transfer in humans in this research topic a collection of original research and review articles highlights critical aspects of the interaction between gene aav vectors and the immune system discussing how these interactions can be either detrimental or constitute an advantage depending on the context of gene transfer and providing tools and resources to better understand the issue of immunogenicity of aav vectors in gene transfer

tuberculosis tb is a global infectious disease caused by the mycobacterium tuberculosis complex the number of deaths caused by tb is second only to covid 19 therefore vaccination plays an essential role in the prevention and control of tb however the efficacy of currently licensed tb vaccine bacilli calmette guérin bcg varies from 0 80 in adults and the protection only lasts for 10 15 years thus there is an urgent need to develop advanced tb vaccines against tb infections

this is a completely new typeset of the monumental 1957 classic containing an extensive historical and theological introduction and detailed in text notations by george r knight originally produced by the ministerial association of the general conference of seventh day adventists questions on doctrine was widely acclaimed and distributed in the late 1950s and early 1960s as a forthright answer to questions from evangelicals about key elements of adventist doctrine controversy regarding the book s position on the nature of christ and the atonement soon stopped its circulation as part of the adventist classic library knight s essays provide the background for how the book came about and describes the interaction of the principal players involved in the crisis that shelved this classic work for more than a generation

includes sections activities of the research council on problems of alcohol and current literature
